- 2 -

one rank lower than what they held before.

- Morale of the troops. While troops are generally well paid and fed, the common man in the Army, even if he was a former Communist, can be considered as unreliable in case of a conflict or at first contact with Allied troops. The exceptions to this will be: the Political Officer Corps; the Militarized Police forces, which have committed such acts of terror that they have no choice but to fight; and the newly created Women's Auxiliary Corps (Budapest, Pecs, Szeged, Debrecen, Miskolc). The WACs number 400 per battalion and are recruited mainly from former Police Agents.
- 6. Army Construction. An unidentified architect had to give up his private business and is now engaged by the State to check military construction. This architect earns 1,600 floring per month, and is constantly travelling throughout the country. Although he is under drastic security control, this architect has let it be known that he is supervising the surface and subterranean construction of barracks, arms depots, bridges, and airports.
- 7. Concomitant with the reorganization of the Hungarian Army, Soviet troops are organizing their bases throughout the country. It is popular opinion that Hungarian military construction is behind schedule because the Russian installations have priority.
- 8. Extremely secret and highly important dumps, mostly underground, are under construction in the region of Mad (Tokaj area). The project is exclusively under Soviet control and will serve Russian military purposes. Underground railways (sic) indicate that this region, near the communications lines of Czechoslovakia (Kośice) and the Soviet Carpatho-Ukraine (Užhorod-Beregszász), will be the main military depot of Soviet troops in Hungary.

25X1	*	Comment	Probably	tent

25X1

* Comment: It is more than evident that this ex-reserve officers' corps will be the most unreliable element of the Hungarian-Soviet Army in the event of mobilization, even if they are controlled by Loyalist officers or Politruks.)
